Innovative IP based AV storage solutions

Centralize recording, media management, and content creation with secure network attached storage (NAS) and integrated media asset management.

Simplify Your AV Infrastructure
Simplify infrastructure by capturing media to secure RAID protected storage over standard IP networks.

Centralized Content for Digital Signage
Host, manage, and play your media from a secure and centralized network storage server to video walls on stage, in stadiums, or across campus.

Campus Wide Recording
Capture every lecture and event on campus to secure high speed storage.

Improved Production to Post Turnaround
Capture media over IP or SDI and make your content immediately available to editors during event production.

Review, Manage, and Organize Assets
Use built-in media asset management software to review recordings, tag assets, and log comments against clips from a web browser anywhere on the network.

Sync, Backup, and Replication
Use built-in data movement and automation tools sync, backup, and replicate media across multiple systems and cloud storage locations to make sure your content is always secure.
