Whether you need to encode your live video signals on-premises, in the cloud, or across multiple environments, FLICS LIVE from Hiscale formats your live content for delivery to broadcasters and streaming services.

FLICS LIVE is Hiscale’s high-quality encoding solution for broadcast and media customers that enables SD, HD and UHD real-time processing in one easy-to-manage software application.

**FEATURES**

**Deployment Options**
- Virtual machines
- Common off-the-shelf hardware
- Intel & AMD support
- AWS
- MS Azure
- Google Cloud
- IBM Cloud
- Alibaba
- Digital Ocean
- Linode
- Hetzner
- Ionos
- Open Telekom Cloud
- Hybrid deployment option

**Management & Operation**
- FLICS LIVE SOLO self-contained transcoding solution
- FLICS LIVE CLUSTER with redundancy option
- Linux Operating System
- Web-based UI
- Job queue management
- Priorization
- Central logging
- Hyper-scalability with true Multi-Cloud capabilities
- Thumbnail preview
- Live Video player

**Processing**
- Alternative sources
- Fallback to Image/Video-Loop
- Event Scheduling
- Pre- & Postroll
- Alarm tracking
- 4:2:2 and 10 bit support
- 601/709/BT 2020 color space
- Color space conversion
- Up- & Downscaling
- Cropping
- Logo & Timecode insertion
- Color Filter (HSBC)

**Integration**
- RESTful API
- SNMP
- Webhook
- Email notification

**Options**
- High-quality, motion compensated live frame rate conversion (FrameFormer by InSync Technology)
- Automated Loudness Management (Level Magic by Jünger Audio)

Features are subject to change.
