

Cloud object storage that's purpose-built for M&E

Imagine being able to affordably store ALL of your content in the cloud, from raw footage to finished product— everything securely archived yet immediately accessible at a moment's notice. Our breakthrough hot cloud storage technology enables us to offer one simple, single tier of service that's blazingly fast yet 1/5th the cost of AWS S3, Google Cloud, or Microsoft Azure.

Price

Put more money into production, not in storage. Wasabi is 80% cheaper with no fees for egress or API requests.

Performance

Streamline production workflows and enable remote collaboration with lightning-fast hot cloud storage.

Protection

Protect your valuable content from ransomware or accidental deletions with Wasabi S3 Object Lock at no additional cost.

A bottomless cloud for endless use cases

ACTIVE ARCHIVE: All the content you store in Wasabi is immediately accessible, whenever you need it, from a single tier of high-performance cloud object storage – not buried in some off-network tape library or glacially slow cold storage.

BACKUP & RECOVERY: Ideal for offsite backups, Wasabi's breakthrough pricing and storage immutability make state-of-the-art data protection affordable.

REMOTE COLLABORATION: Share files and edit in the cloud. Wasabi's high-speed performance and no-charge-for-egress pricing streamlines production workflows without killing your budget.

NEARLINE STORAGE: Save on expensive tier 1 storage by offloading infrequently accessed files to Wasabi instead of more costly NAS/SAN infrastructure that you'll have to manage and maintain.

DISTRIBUTION: When you move production to the cloud, distribution is as simple as notifying each distributor that final content is ready. Wasabi also works great as origin storage for a CDN—playback is smooth and there are zero recurring fees each time a new file needs to be pulled onto the network caches.

We solve the data storage problems of some of the biggest names in the industry

"Wasabi has proven to be an easy to use centralized storage environment for a range of studio assets. The process of transferring assets to the service is straight forward and all stored content is immediately available so our creative teams can continue to work uninterrupted. And with no egress charges, we don't have to worry about how often we access our Wasabi storage or download assets for review and repurposing."

Wasabi is the Official Cloud Storage Partner of the Liverpool Football Club and the Boston Bruins, and a Proud Partner of the Boston Red Sox.
