

LECTURE CAPTURE

WORKFLOW

THE CLASSROOM OF THE FUTURE MADE SIMPLE

WHY BRING LECTURE CAPTURE TO YOUR CAMPUS?

FLEXIBILITY:

Use of lecture capture technology allows students to access the lecture content at their own pace and convenience, from anywhere with an internet connection.

ACCESSIBILITY:

Lecture capture can help students with disabilities who may have difficulty attending classes in-person or to improve attendance by keeping students from missing classes.

IMPROVED LEARNING

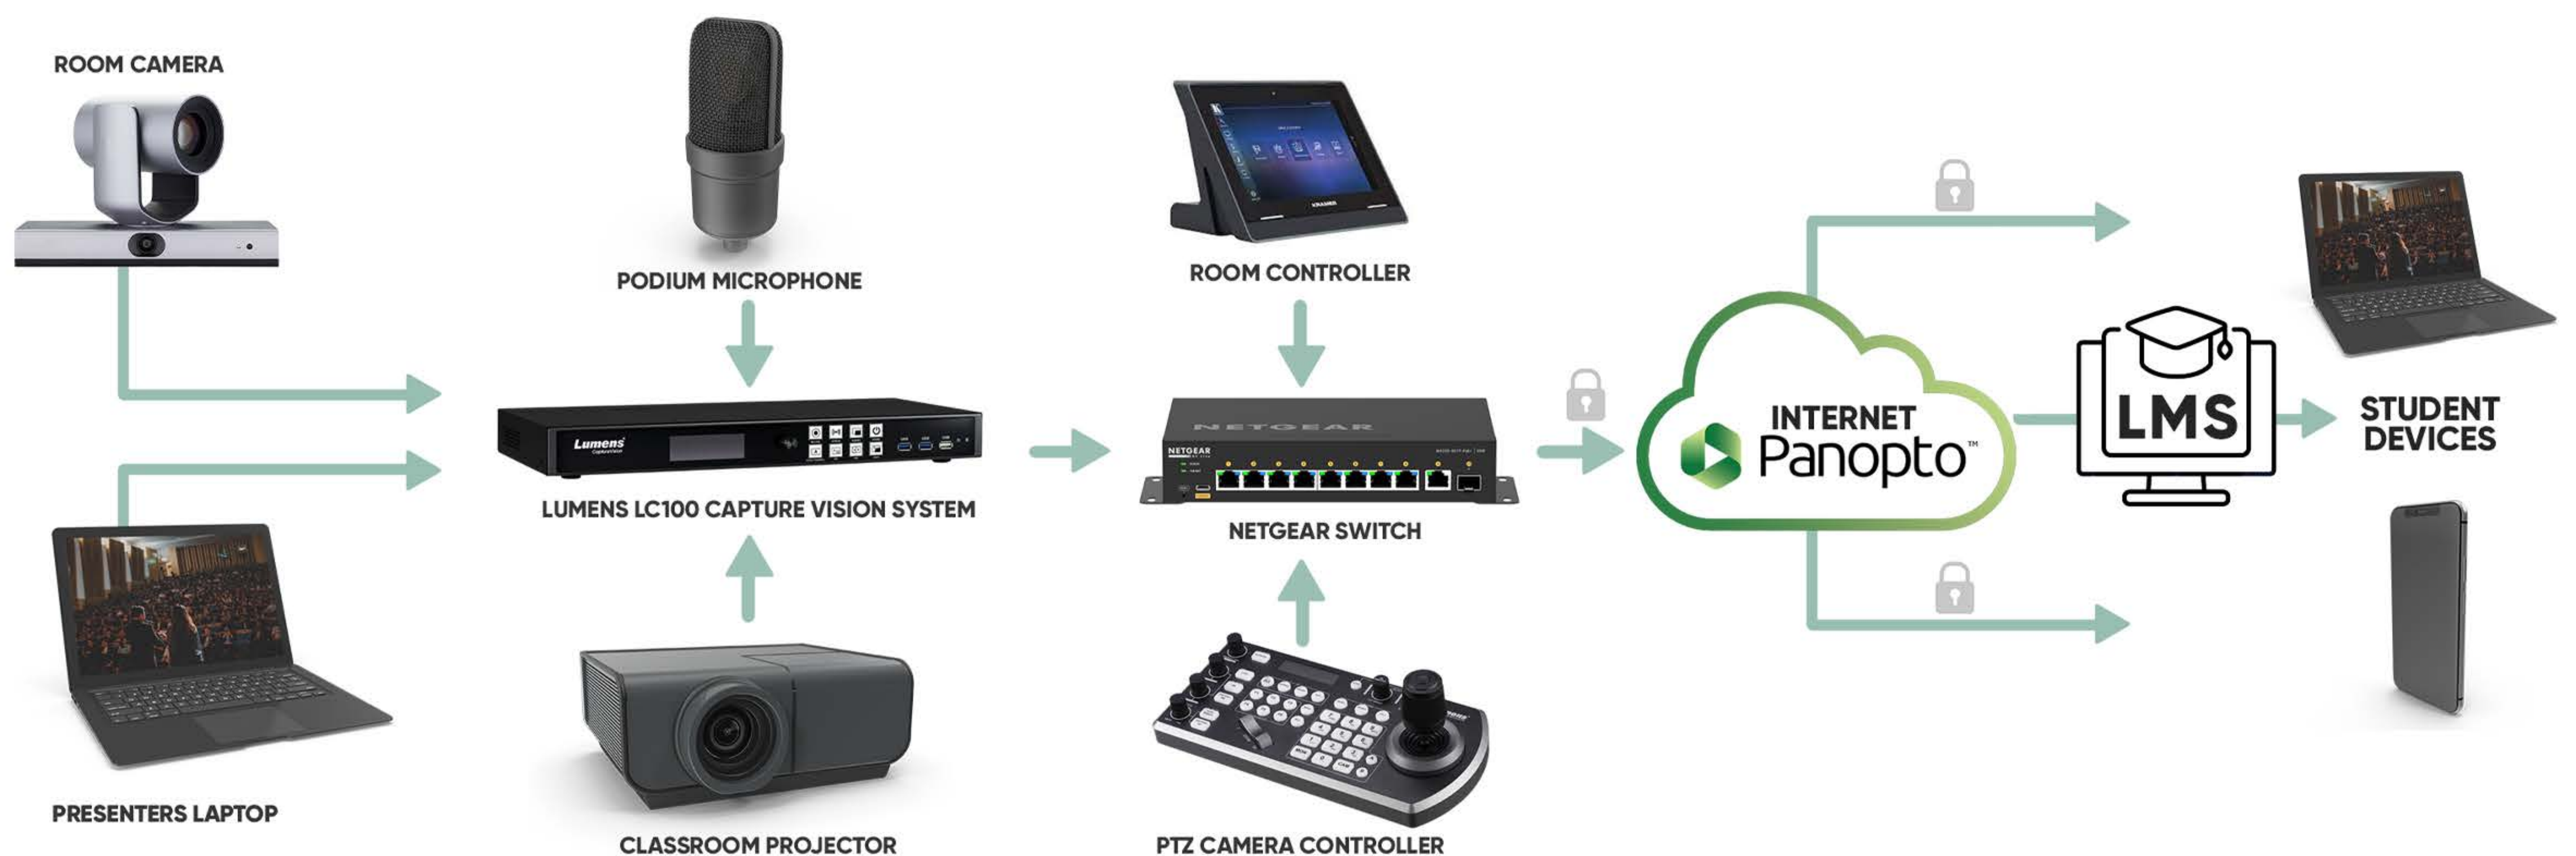

Students can review the lecture content as many times as they need to, which can lead to better understanding and retention of the material. With modern lecture capture platforms students can even choose between cameras and presentations to customize how they personally review the media.

COST-EFFECTIVE:

Lecture capture can be a cost-effective way to deliver course content, especially for large classes where it may be difficult to provide personalized attention to every student.
